SAP SD / ORDER-TO-CASH CONSULTANT • Requirements to Go-Live & Hypercare • CRM • SAP S/4HANA

SUMMARY

SAP SD and order-to-cash consultant with 3 years at Accenture and a master's in Engineering Management, who takes client sales processes from discovery workshops through configuration, testing, cutover and hypercare. Across 3 full-lifecycle S/4HANA implementations for a global mining operator in 90+ countries I owned the order management workstream behind the client's \$250M business expansion and drove 24 enhancements that cut technology cost 27% and lifted user adoption 17%.

EXPERIENCE

SAP Functional Consultant | Accenture

Jul 2021 – Aug 2024

- Gathered requirements in discovery and fit-gap workshops with client sales, customer service and supply chain leads in 90+ countries, turning as-is order-to-cash pain points into the to-be S/4HANA design for the client's \$250M business expansion.
- Converted approved requirements into functional specifications and high-level designs that ABAP and integration teams built from, sizing each deliverable and walking client process owners through the design to sign-off before build.
- Configured SAP SD across sales document types, pricing and condition technique, deliveries, billing and returns, and built the order and contract structures that made a \$200M new product line sellable from the day it launched.
- Owned the Sales Cloud (CRM) module upstream of SD, automating lead to customer on MDG workflows, sales quotation, quote-to-order and quote-to-contract creation with approval routing that ended rekeying and lifted process performance 13%.
- Specified and tested SaaS CRM to S/4HANA and logistics interfaces built on EDI, IDocs, SAP CPI and PI/PO across a 3-system landscape, running root cause on replication and IDoc failures before they reached customer deliveries.
- Wrote the test scripts and led SIT, UAT and regression cycles with business users, driving defect triage and retest to closure and releasing 24 enhancements across a \$30M Agile portfolio, 16 of them in order-to-cash, and cutting technology cost 27%.
- Owned order-to-cash cutover across 3 go-lives, running mock cutovers, validating master data loads and migrating open sales orders, so each wave took orders from day one of an ECC to S/4HANA move that cut operating cost 18%.
- Was the single point of contact for the CRM workstream through hypercare and worked the order-to-cash pod on P1 and P2 tickets, converting the recurring ones into SOPs and client enablement workshops that lifted user adoption 17%.

Supply Chain Intern | Hydac

Jan 2021 – Apr 2021

- Built a KPI-driven supply chain dashboard measuring assembly-unit efficiency at 57% and applied structural equation modeling to isolate the key efficiency drivers across supplier, manufacturing, and distribution functions.
- Modeled a demand-driven inventory scenario (DDMRP) with supporting process and workflow changes, defining a phased implementation roadmap targeting up to 70% assembly-unit efficiency within the next three quarters.

EDUCATION

M.S., Engineering Management | University of Massachusetts Amherst
(Graduate Certificate, Engineering Project Management & Leadership)

GPA: 3.7/4.0 | May 2026

B.E., Production Engineering | PSG College of Technology

GPA: 8.3/10.0 | May 2021

KEY PROJECTS

- **Order-to-Cash Process Mining (synthetic data):** Rebuilt an order-to-cash log of 18,181 events across 1,800 sales orders into the as-is process with LLM-assisted engineering to find where cycle time was lost, ranking backorder release at 18.6% of orders and 4.9 days ahead of credit and export holds and moving the operational measure to fulfillment lead time.
- **Order Status Cockpit (SAP Fiori):** Built an SAP Fiori and SAPUI5 master detail application that follows each sales order through order-to-cash, from credit check and availability to delivery and billing, flagging exceptions so customer service can answer order status without raising a system escalation to IT, replacing a manual status-check routine.

CORE COMPETENCIES

- **SAP SD & Order-to-Cash:** Order and contract types, pricing and condition technique, invoicing and credit memos, credit management and blocks, availability check and backorder handling, document flow from order to billing.
- **Lead-to-Cash & CRM:** SAP CX Sales Cloud (C4C V1, SaaS), opportunity management, sales quotation, quote-to-order and quote-to-contract automation, approval routing, status flow configuration, service request and case handling.
- **Delivery & Methods:** Agile and sprint delivery, requirements gathering, gap analysis, business process flows, cutover planning and go-live checklists, data migration, change management, end-user training and SOPs, stakeholder management.
- **Integration & Tools:** EDI and IDocs, SAP CPI and PI/PO, REST and SOAP APIs, cloud to on-premise replication and interface monitoring, Power BI, SAP Analytics Cloud, SQL, GenAI tools with response validation for faster documentation.

LEADERSHIP & RECOGNITION

- Recognized by client and Accenture leadership as a top performer for delivery consistency across 3 years.
- Promoted to Student Supervisor at UMass, running 15+ staff per shift across 7 stations serving 7,000+ customers a day.
- Led the student board as Chairperson for 500+ students, Department of Production Engineering, PSG College of Technology.
- Certifications: Career Essentials in Project Management (Microsoft/LinkedIn), Successful Negotiation, AI for Everyone.
