PROGRAM & PROJECT MANAGER • TECHNOLOGY DELIVERY • CROSS-FUNCTIONAL LEADERSHIP

PROFESSIONAL SUMMARY

Project and program delivery professional pairing 3+ years at Accenture with an M.S. in Engineering Management (UMass Amherst, May 2026), leading full-lifecycle technology and enterprise transformation programs end to end — owning scope, schedule, budget, risk, and stakeholder management across cross-functional teams of up to 11 and multiple concurrent projects, with consistent, measurable efficiency and cost gains.

CORE COMPETENCIES

Program & Project Management: End-to-end / full-lifecycle delivery, scope / schedule / budget, program governance, roadmaps & milestones, risk & impact assessment, dependency management, change management, issue & risk tracking.
Stakeholder & Communication: Requirements gathering, business-process analysis, stakeholder alignment, executive status reporting, KPI dashboards, go / no-go & feasibility assessment, knowledge transfer
Delivery & Quality: Agile / Scrum, hybrid & Waterfall, SDLC, SIT / UAT / RT, quality gates, release management, cutover, go-live & hyper-care, SOP & FS documentation, process improvement
Tools & Data: Jira, Confluence, ServiceNow, MS Project, SharePoint, MS Teams; Power BI, Tableau, SAP Analytics Cloud; Advanced Excel, SQL, Python, Snowflake; SAP S/4HANA & SAP CX (ERP/CRM)

PROFESSIONAL EXPERIENCE

Project Delivery Consultant (Enterprise Technology) — Accenture

Jul 2021 – Aug 2024

- Delivered 3 full-lifecycle enterprise transformation programs — a \$250M business expansion, a new product line projected to generate ~\$200M in revenue, and a merger integrating an acquired business into the client's enterprise systems — owning scope, schedule, and budget end to end while leading a cross-functional team of 11 (3 direct reports) through change management, stakeholder alignment, and go-live.
- Orchestrated multiple concurrent projects and workstreams (standalone plus cross-functional), coordinating dependencies across supply chain, commerce, data, and analytics teams to keep parallel deliveries on schedule.
- Led a cross-functional workstream of a global ERP platform modernization (legacy-to-next-gen migration), directing current-to-future-state design, build, integration, and cutover, and authored hyper-care SOPs that stabilized go-live and reduced operational costs 18%.
- Directed 24 Agile enhancement projects (standalone and cross-functional) with a combined budget of \$10M–\$30M, running business-process assessment and feasibility / risk analysis and driving sprint delivery that raised system efficiency 15% and cut operational costs 27%.
- Owned the requirements-to-go-live cycle: translated business requirements into functional specifications and design (HLD / FS), governed quality gates (SIT / UAT / RT), and managed defect-free releases across on-premises and cloud environments.
- Built executive KPI dashboards (Power BI, Tableau, SAP Analytics Cloud) for delivery and operations visibility, resolved priority (P1 / P2) incidents to root-cause closure, and led knowledge-transfer and lessons-learned sessions while coaching junior team members.

Supply Chain Intern — Hydac Private Limited

Jan 2021 – Apr 2021

- Built a KPI-driven supply-chain dashboard measuring 57% supply-chain efficiency and applied structural equation modeling to map the critical path; recommended Demand-Driven MRP (DDMRP) actions targeting 70% efficiency within three quarters by aligning inventory with real-time demand and reducing bottlenecks.

KEY PROJECTS

- OTC Process Mining & Bottleneck Analyzer:** Built a Python process-mining pipeline on an order-to-cash event log to reconstruct the as-is process and quantify cycle-time delays. Ranked the top bottlenecks (backorders, credit blocks, compliance holds) to target where intervention would most reduce delays.
- UMass Transit Infrastructure (WarmStop):** Built the product vision, go-to-market strategy, and KPI-driven roadmap for a winter transit-seating product, with market sizing (30,000+ commuters; ~\$1.1M five-year path) and competitive / SWOT / PESTLE analysis. Defined the business case, success metrics (bench utilization <10% to >60%), and a phased plan scaling a \$10K pilot toward regional rollout.
- Smart Trash System:** Project-managed the end-to-end plan for an IoT bin-monitoring system in MS Project, building the work breakdown structure, a \$246K cost estimate (15% contingency), and a Gantt schedule across a 136-day timeline. Ran critical-path analysis (99-day path) and schedule-recovery and risk-mitigation strategies, and coordinating stakeholders.

EDUCATION

M.S., Engineering Management — University of Massachusetts Amherst
(Graduate Certificate, Engineering Project Management & Leadership)

GPA: 3.7/4.0 | May 2026

B.E., Production Engineering — PSG College of Technology

GPA: 8.3/10.0 | May 2021

LEADERSHIP & RECOGNITION

- Recognized by client and Accenture leadership as a top performer for delivery consistency.
- Promoted to Student Supervisor, UMass Auxiliary Enterprises.
- Student Chairperson, PSG College of Technology.
