PROGRAM & PROJECT MANAGER • TECHNOLOGY DELIVERY • CROSS-FUNCTIONAL LEADERSHIP

SUMMARY

Project and program delivery professional pairing 3+ years at Accenture with an M.S. in Engineering Management, leading full-lifecycle technology and enterprise transformation programs end-to-end, owning scope, schedule, budget, risk, and stakeholder management across cross-functional team of 11, with consistent, measurable efficiency and cost gains.

EDUCATION

M.S., Engineering Management — University of Massachusetts Amherst
(Graduate Certificate, Engineering Project Management & Leadership)

GPA: 3.7/4.0 | May 2026

B.E., Production Engineering — PSG College of Technology

GPA: 8.3/10.0 | May 2021

EXPERIENCE

Technology Consultant (Program Management) | Accenture

Jul 2021 – Aug 2024

- Delivered 3 full-lifecycle enterprise transformation programs, a \$250M business expansion, a new product line projected to generate \$200M in revenue, and a merger integrating an acquired business into the client's enterprise systems owning scope, schedule, and budget end to end while leading a cross-functional team of 11 (3 direct reports) through change management, stakeholder alignment, and go-live.
- Orchestrated multiple concurrent projects and workstreams (standalone plus cross-functional), coordinating dependencies across supply chain, commerce, data, and analytics teams to keep parallel deliveries on schedule.
- Led a cross-functional workstream of a global ERP platform migration, directing current-to-future-state design and authored hyper-care SOPs that stabilized go-live and reduced operational costs 18%.
- Directed 24 Agile enhancement projects (standalone and cross-functional) with a combined budget of \$30M, running business-process assessment and feasibility / risk analysis and driving sprint delivery lifting user adoption by 17% (driven by faster task completion) and process performance by 13%, while cutting operating expenditure by 27% (client-measured, current-to-future-state).
- Owned the requirements-to-go-live cycle: translated business requirements into functional specifications and design (HLD / FS), governed quality gates (SIT / UAT / RT), managed defect-free releases across on-premises and cloud environments.
- Built executive KPI dashboards (Excel, SAP Analytics Cloud) for delivery and operations visibility, resolved priority (P1 / P2) incidents to root-cause closure, and led knowledge-transfer and lessons-learned sessions while coaching junior team members.

Supply Chain Intern | Hydac Private Limited

Jan 2021 – Apr 2021

- Designed a KPI driven supply chain dashboard for operational visibility and applied Structural Equation Modeling (SEM) to map the critical path against a 57% efficiency baseline.
- Modeled inventory with Demand Driven MRP (DDMRP) to align forecasting with real-time demand, recommending process changes targeting 70% efficiency within three quarters.

KEY PROJECTS

- OTC Process Mining & Bottleneck Analyzer:** Built a Python process-mining pipeline on an order-to-cash event log to reconstruct the as-is process and quantify cycle-time delays. Ranked the top bottlenecks (backorders, credit blocks, compliance holds) to target where intervention would most reduce delays.
- UMass Transit Infrastructure (WarmStop):** Built the product vision, go-to-market strategy, and KPI-driven roadmap for a winter transit-seating product, with market sizing (30,000+ commuters; ~\$1.1M five-year path) and competitive / SWOT / PESTLE analysis. Defined the business case, success metrics (bench utilization <10% to >60%), and a phased plan scaling a \$10K pilot toward regional rollout.
- Smart Trash System:** Managed the end-to-end plan for an IoT bin-monitoring system in MS Project, building the work breakdown structure, a \$246K cost estimate (15% contingency), and a Gantt schedule across a 136-day timeline. Ran critical-path analysis (99-day path) and schedule-recovery and risk-mitigation strategies and coordinating stakeholders.
- UMass Transit Infrastructure (WarmStop):** Owned the product vision, design-thinking analysis (SWOT / PESTLE), and a KPI-driven roadmap for a winter transit seating product, with market sizing (30,000+ commuters; ~\$1.1M five-year path), a business case, and a phased plan scaling a \$10K pilot to regional rollout.

CORE COMPETENCIES

- Program & Project Management:** End-to-end / full-lifecycle delivery, scope / schedule / budget, program governance, roadmaps & milestones, risk & impact assessment, dependency management, change management.
- Stakeholder & Communication:** Requirements gathering, business-process analysis, stakeholder alignment, executive status reporting, KPI dashboards, go / no-go & feasibility assessment, knowledge transfer
- Delivery & Quality:** Agile / Scrum, hybrid & Waterfall, SDLC, SIT / UAT / RT, quality gates, release management, cutover, go-live & hyper-care, SOP & FS documentation, process improvement
- Tools & Data:** Jira, Confluence, ServiceNow, MS Project, SharePoint, MS Teams, Power BI, Tableau, SAP Analytics Cloud, Excel (Pivot Tables, VLOOKUP), SQL, Python, Snowflake, SAP S/4HANA & SAP CX (ERP/CRM)

LEADERSHIP & RECOGNITION

- Recognized by client and Accenture leadership as a top performer for delivery consistency and dedication.
- Promoted to Student Supervisor by UMass Auxiliary Enterprises for reliability, collaboration, and leadership.
- Led the student board as Student Chairperson, Department of Production Engineering, PSG College of Technology.
- Professional Development: Career Essentials in Project Management (Microsoft / LinkedIn), Successful Negotiation.
